

# R

You have to go  
to the source.

Sure, casting can be tricky.  
It's not just where you go, but knowing  
when to go there. We match your need  
with one of our casting partners.

That's how we do it here.  
That's why it takes understanding  
the customer to provide them with castings  
that are built to the right specs.  
That's smart business.

We're Riverside.  
We've got strategic partners.  
that know that they have to deliver.  
All over the world.

## Riverside Rotors

The design seems simple.  
But what goes into it isn't.  
Riverside can provide you with  
the right replacement rotor for  
your application. Spider, Disc or  
Revolution, Riverside works closely  
with partners to deliver as promised.  
On time. Price is important; we  
recognize that, but quality  
is too. You can get both  
with Riverside.

We're on the move this year.  
We appreciate your feedback  
telling us just that. Call us  
and see how we deliver.

We continue to grow relationships.  
With partners willing to make it our way.  
The right way. Looking ahead.  
Knowing that innovation can come  
with a big idea.  
Or a minor modification.  
Moving everyone ahead.  
The future is now.
